Contribution to Neurosciences

I have been actively associated with Delhi Neurological Association since its inception in 1995, in fact it is probably one of the most vibrant regional Neurological Association of the country. It meets 12 times in a year to discuss academics for one hour on first Saturday of every month. It has held 15 annual meetings on time without fail. It has been my privilege to be associated with association, first as treasurer and now as secretary both times unopposed that is without any elections.

I am executive member of Delhi Spine society which also bimonthly meetings as well as regular Annual meetings. My center is an active host of one of the monthly meetings regularly.

I am a convener of Delhi Neurointervention forums, which I started with two other radiology colleagues, two years ago it meets every two months on third Thursday to share experience in this nascent branch, from physicians drawn from Neurosurgery, Neurology and Neuroradiology. In fact this has been one of the most satisfying experiences to make people share platform and keep it going.
